Gerflor The Healthcare Specialists

With over 80 years of experience in the healthcare sector, Gerflor has built an unrivalled reputation for quality and service.

The Gerflor group is well known as a credible and valued supplier of complete flooring solutions designed specifically for the healthcare market. The requirements for hygiene, slip resistance and acoustic qualities are part of the mandatory characteristics for this sector. Our expertise allows us to offer flooring products suitable for all areas of a healthcare facility. Whilst maintaining the technical performance and design aspect of our floorcoverings, we develop sustainable ranges that have the health and wellbeing of staff and patients in mind. We manufacture proven product ranges for demanding healthcare environments including Mipolam, Taralay, Taraflex®, Tarasafe and Premium.

SPM represents our french specialist range of wall protection and handrail solutions, backed by over 40 years of expertise. SPM develops innovative, functional and decorative products designed to protect, improve and ensure the sustainability of buildings open to the public. With a comprehensive range of designs and solutions, SPM offers wall protection, corner guards, handrails and door protection systems that are ideally suited to healthcare facilities and can be seamlessly coordinated with our flooring ranges.

Gerflor Services

TECHNICAL AND SPECIFICATION SUPPORT SPECIALISTS

Gerflor's dedicated Healthcare Specialists are available to support all your specification needs. Whether you are undertaking a new build or a refurbishment project, we have the expertise, products and innovative solutions to meet a wide range of budgets. Working closely with our partners, we collaborate to identify and deliver the most appropriate solutions for each client's needs ensuring they are safe, hygienic, sustainable, and fit for purpose. Our commitment extends beyond specification support, we can also offer a free site survey. Our specialists can visit, assess and audit the facility and suggest improvements to future proof building interiors.

The Technical Support team is available to offer advice on the specification and installation of products, including guidance on the latest healthcare building standards and legislation. Gerflor has a world class pedigree of products that are tried and trusted, backed by a network of technical, specification and customer support teams.

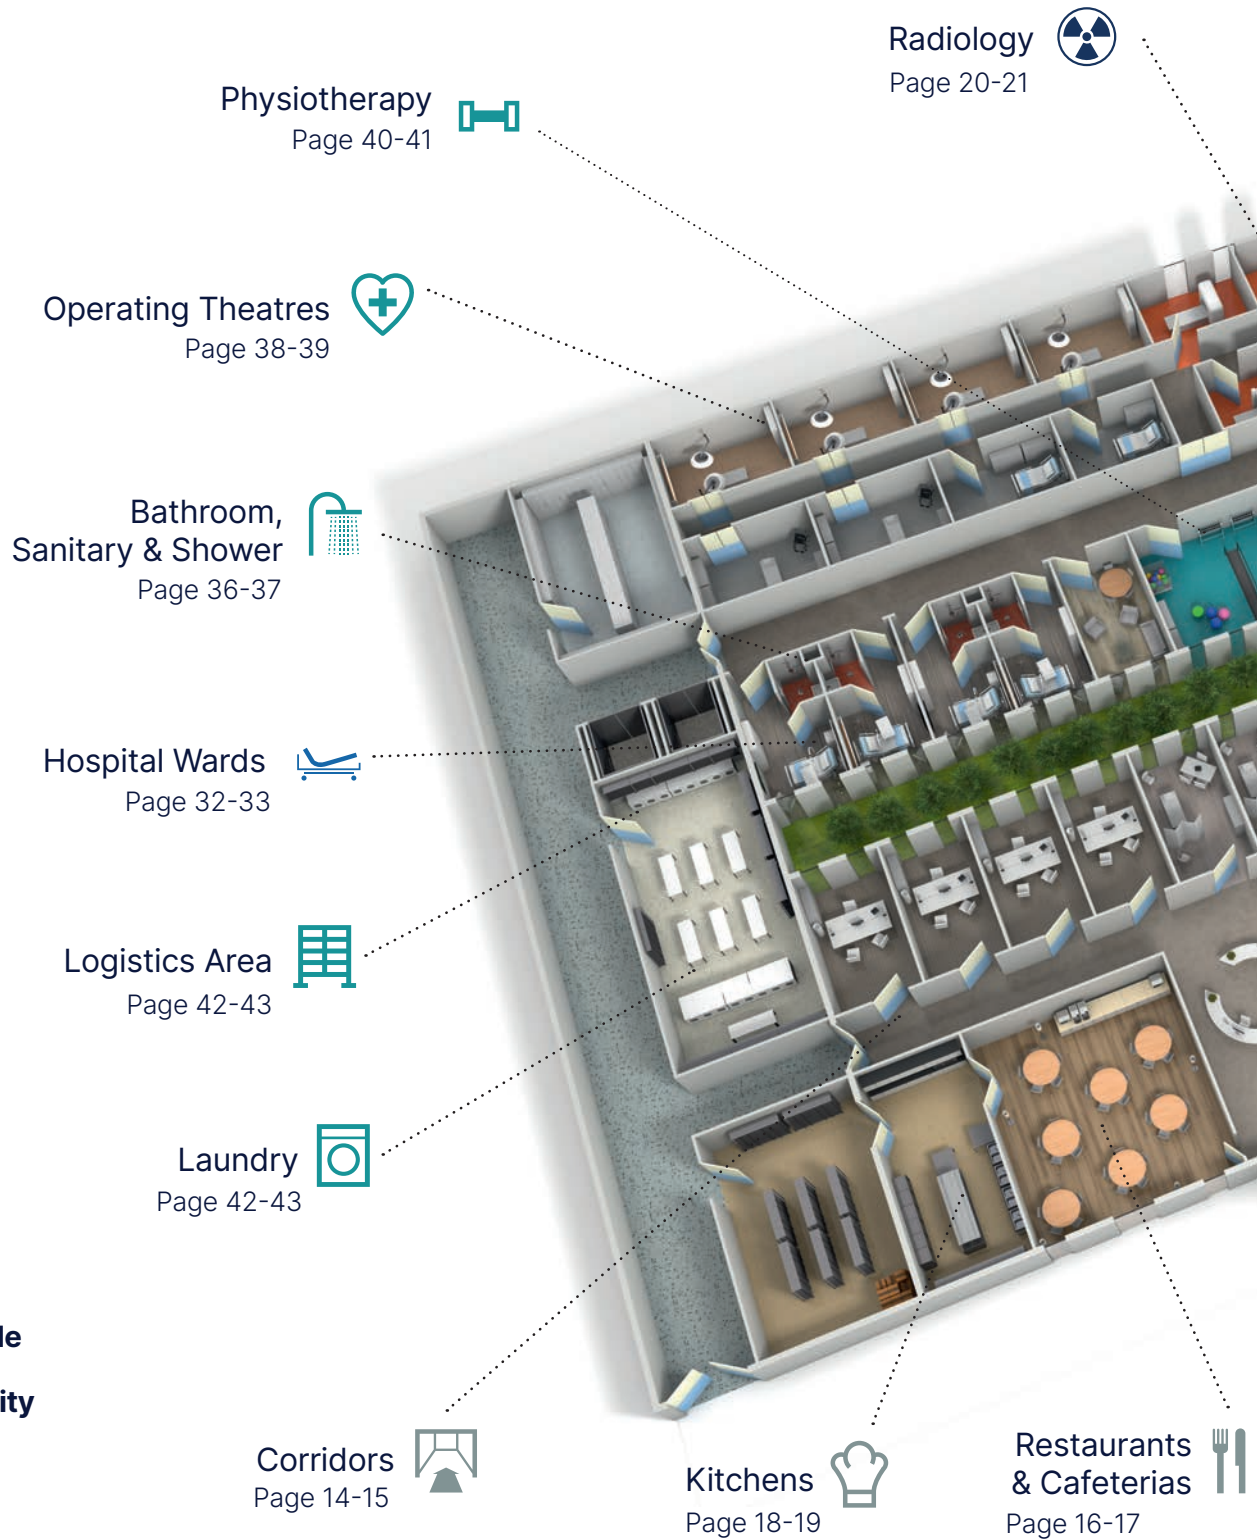

SAMPLING SUPPORT SERVICES FOR EVERY NEED

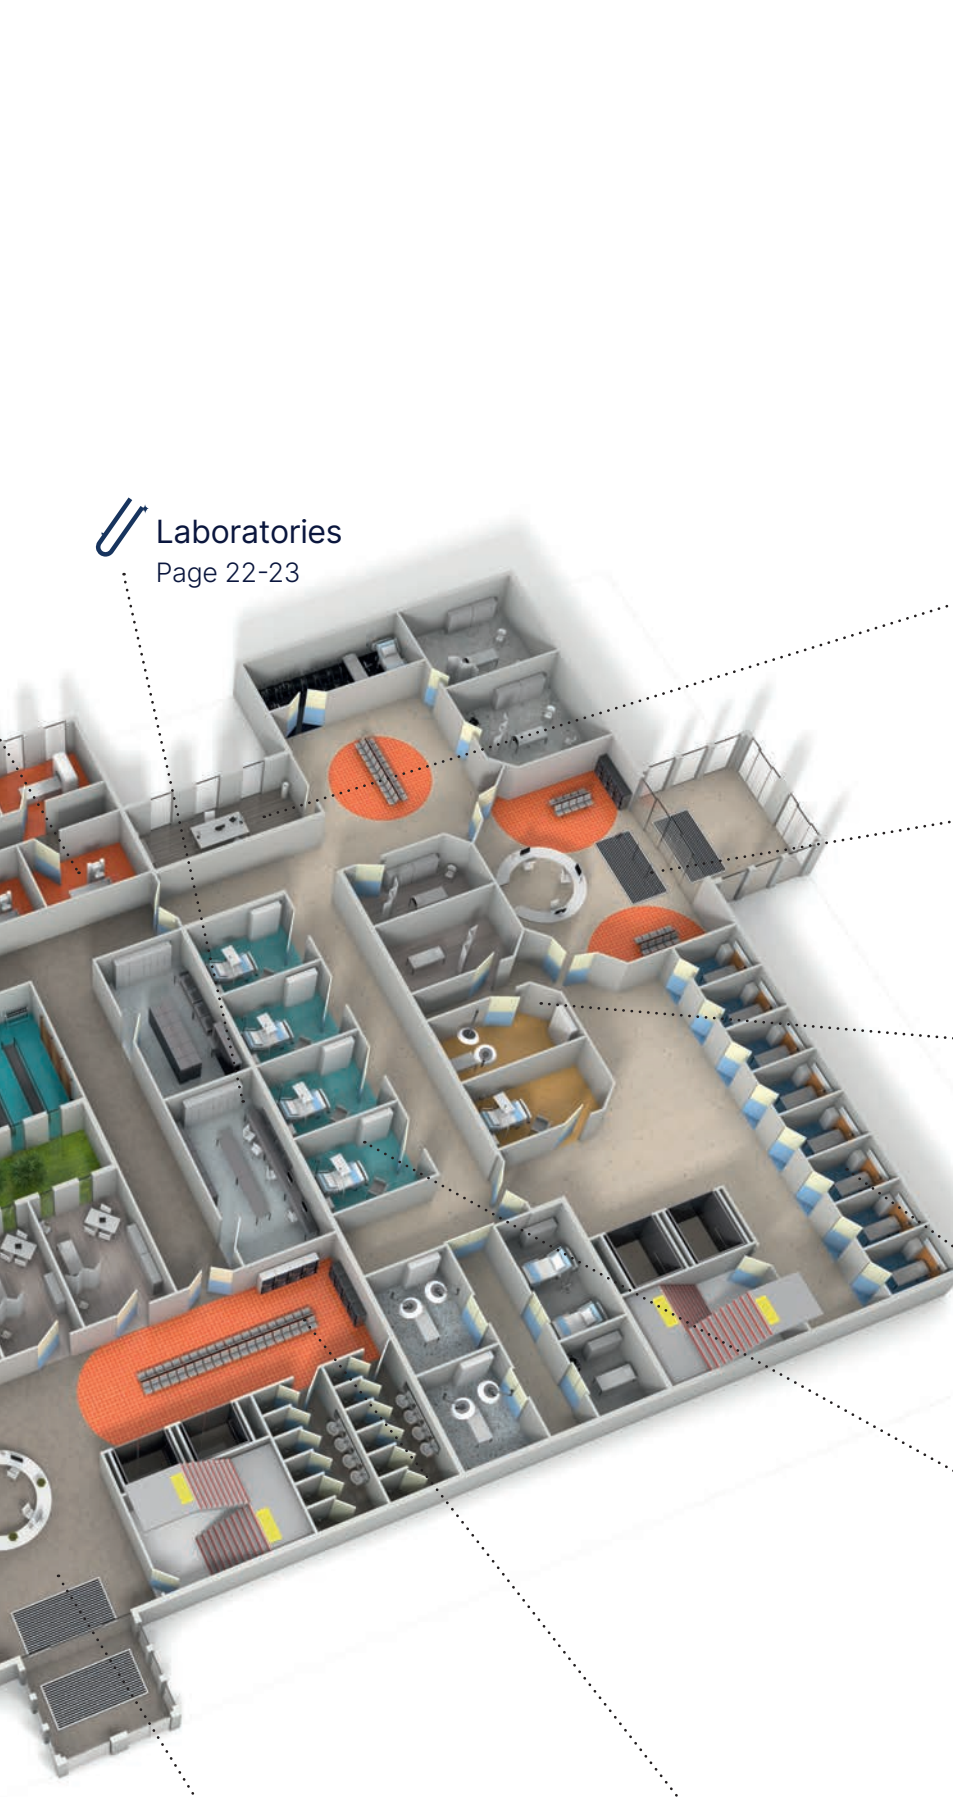

We offer a free sampling service for all our healthcare clients from range overview binders and loose samples to supporting literature or test material. To request a sample, literature or technical advice, please contact our local expert team

Entrance & Reception Areas

Key considerations when selecting Flooring and Wall Protection products for Entrance & Reception Areas

- ✓ Bright, calm and welcoming environment
- ✓ Resistance to heavy traffic
- ✓ Good slip resistance on floors
- ✓ Practical in design to facilitate building access
- ✓ Protecting walls and corners that are vulnerable to damage
- ✓ Zoning and navigation assistance

Complementary Products

Corridors

Key considerations when selecting Flooring and Wall Protection products for Corridors

- ✓ Products that withstand heavy traffic both pedestrian and wheeled
- ✓ Products should offer zoning and navigation assistance
- ✓ Flooring must be slip resistant and able to cope with heavy rolling loads
- ✓ Robust Wall Protection system to protect vulnerable walls and corners
- ✓ Handrails for guidance and support

5037 Slate Grey

5047 Middle Marylin

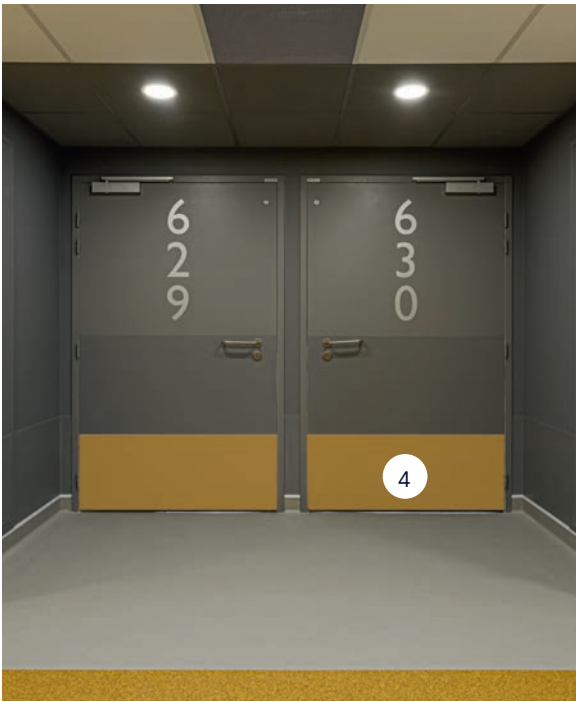

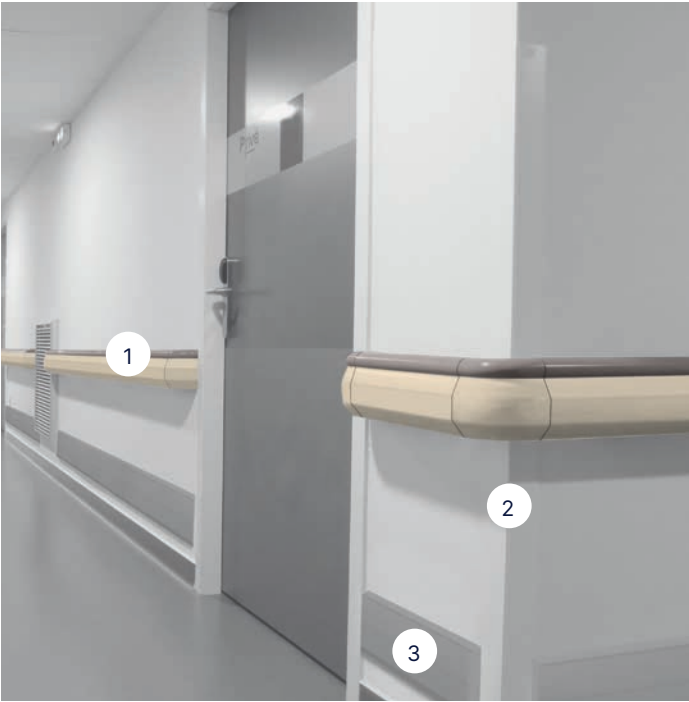

5035 Springfield

5024 Blue Lake

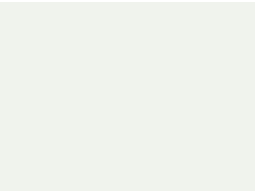

WALL PROTECTION SYSTEMS

Corridors and circulation areas are among the busiest spaces within a building, accommodating a constant flow of both pedestrian and wheeled traffic that connects movement throughout the facility. This high level of activity requires a robust protection system to safeguard walls and corners from scuffs and impact damage from trolleys, wheelchairs, beds, equipment and other wheeled traffic.

Innovation for Clinical Healthcare Environments

INNOVATIVE CLEAN CORNER SYSTEM

A complete solution for installing corners that aid the control of contamination.

Controlling contamination in general healthcare environments as well as ultra clean areas such as burns units, pharmacies and operating theatres is a challenge. Corners, in particular, are where most of the installation imperfections are found:

- Their shape makes cleaning and decontamination difficult.
- Poorly welded, they can tear or sag under the weight of traffic.
- Weakened by use, they end up losing their water-tightness.

In partnership with cleaning professionals, Gerflor has developed an innovative patented Corner System. Thanks to ultra-resistant and versatile profiles (**Photo 1**), Clean Corner System is suitable for all projects and delivers perfect results (**Photo 2**) with Gerflor floorings.

OUTSTANDING SURFACE TREATMENTS

Our surface treatments are perfect for healthcare environments with unrivalled levels of chemical & stain resistance, reducing maintenance time and cost.

- **No waxing or polishing needed to maintain the floor's appearance or colour brightness**
- **Easy to maintain and no wax for life**
- **Water and detergent saving**
- **Lower environment impact and carbon footprint**
- **Matt effect for enhanced and ultra-realistic design**
- **The best chemical stain resistance surface treatments**

Exclusive surface treatments approved for over 20 years, impenetrable long lasting barrier against stains and chemicals.
