

PICKLEBALL

INDOOR

OUTDOOR

TRIPLE ACTION® Protecsol™

Advanced surface featuring a unique and patented triple-action Protecsol® technology, offering the perfect balance between slip, grip, and easy maintenance.

WEATHER RESISTANT

Special grid design reducing water retention on the surface with superior UV resistant formula.

DURABILITY D-Max™

The D-Max™ surface is a unique system made of calendared PVC layers reinforced with a fibreflass grid, for exceptional durability and outstanding dimensional stability.

PERFORMANCE

Engineered to maximise performance while optimising safety through shock absorption for pickleball players of all ages.

COMFORT CXP™ HD

Taraflex® CXP-HD is a dual-density foam construction that delivers enhanced shock absorption, ensuring optimal player protection and safety.

BALL RESPONSE

Developed to optimise ball bounce and response, with the added benefits of injury protection.

62% Bio, mineral and recycled content with a 43% reduction in carbon footprint compared to previous.

SAFE

Textured surface and tile formation provide the balance between wet and dry traction for low skin abrasion, keeping athletes safe.
